

High School Student School Nomination and Approval

(to be filled out by the faculty mentor and high school official)

The student listed below has expressed interest in participating in the [Princeton University Laboratory Learning Program](#). This program allows a high school student interested in an individualized research experience to be mentored by a member of the Princeton faculty and conduct supervised study in a research laboratory. The student will receive training and instruction and will be expected to follow all of the rules of the laboratory, as well as relevant university policies and procedures.

Description of Proposed Research (filled out by the faculty mentor):

Name of High School: _____

Address of High School: _____

Name of Student: _____

Grade of Student as of the past September: _____

GPA: _____

High School Laboratory Courses Completed and Grade in Course:

- Chemistry _____
- Biology _____
- Physics _____
- Other (please specify) _____

The above named student meets the high school's criteria for participation in the Laboratory Learning Program at Princeton University. The student is in good standing and meets the standards of academic performance, conduct, intellectual curiosity, and maturity necessary to be a successful participant in the research program. The proposed program is approved by the high school as an educational program in science for purposes of N.J.Stat. 34:2-21.17f.
