

POSSIBILITIES AND PARADOX

AN INTRODUCTION TO
MODAL AND MANY-VALUED LOGIC

JC Beall and Bas C. van Fraassen
DRAFT August 15, 2002

CONTENTS

I PRELIMINARIES 1

1 PHILOSOPHICAL MOTIVES	3
1.1 Many Languages, Many Logics .	
1.2 Aristotle's Sea Battle	
1.3 Manifold Paths to Truth	
1.4 Modal Character, Modal Logic. .	
1.5 Possible Worlds	
1.6 A Unified View?	
2 SET-THEORETIC TOOLS	17
2.1 Sets	
2.2 Relations	
2.3 Functions	
2.4 Inductively Defined Sets .	
3 LANGUAGES AND LOGICS	33
3.1 What is a Language?	
3.2 Syntax	
3.3 Semantics	
3.4 Semantic Properties and Relations	
3.5 What is a logic? 	
3.6 Appraisal of Logical Systems	
4 TABLEAUX	49
4.1 Syntax of CPL	
4.2 Semantics	
4.3 Analytic Tableaux: Trees .	

II POSSIBILITIES 69

5 NORMAL MODAL LOGICS	71
5.1 On Ways Things Could Be	
5.2 Modal Propositional Syntax (Smpl) . .	
5.3 Basic Normal Semantics	
5.4 Amending R: Extensions of Lk	
5.5 Tableaux for Normal Modal Logics .	
5.6 Amending R-Rules: Extensions of K	

6 VARIATIONS ON A THEME	105
6.1 Non-Normal Modal Logics
6.2 Paradoxes of Material Implication	.
6.3 Conditional Logic
7.3 Intuitionistic Logic

III PARADOX 125

7 AROUND TRUTH AND FALSITY	125
7.1 Four Corners of Truth
7.2 Many-Valued Languages	...
7.3 The Language L_{FDE}
7.4 Truth and Consequence
7.5 FDE Tableaux

8 GAPS, GLUTS, AND LIARS	145
8.1 The Liar Paradox
8.2 Truth Value Gaps
8.3 Truth Value Gluts
8.4 Meaningless?

9 HEAPS, SUPERTRUTH, AND THE CONTINUUM	159
9.1 The Sorites Paradox	
9.2 Gaps and Supervaluations	
9.3 Sliding Down the Continuum	

IV METATHEORY 179

10 FURTHER TOOLS	179
10.1 Functions, Compounding, Preservation	
10.2 Infinity	
10.3 Inductive Sets and Induction	
10.4 Enumeration of Sentences	
10.5 Valuation Lemma	

11 LOGICAL SYSTEMS AND COMPLETENESS	195
11.1 Logical Systems	
11.2 Tableaux for CPL Reconciled	
11.3. Many-valued Languages and Logics	
11.4 Expressive And Functional Completeness	
11.5 A General Completeness Proof Method	
11.6 Completeness In Manyvalued Logic	

12. ANOTHER LOOK	231
12.1 Unification	
12.2 The standard normal modal logics	
12.3 Logics of conditionals	
12.4 Intuitionistic logic	
12.5 A simple relevance logic	
12.6 Issues of (In-)Finitude
